This scholarship was established in memory of Mandan Amin by her children. Mandan Amin began her life in Iran and learned the importance of education at an early age. Her love of science and medicine paired with strong ambition led her to follow an unconventional path, moving to Tehran and later to Germany and finally the United States to follow her dreams. A common thread in Mandan's life was to actively help people, whether it was disadvantaged children or friends needing support. Mandan was a person who pushed her children and others to be their best selves. She believed that everyone had some talent and through education and hard work, they could realize their own American Dream. This fund is to support students who have the desire and ability to continue their education post-graduation but do not have the financial means to do so.
